Moonlight Beach Barrels and Storm Water Repairs (CD05E)

Maintaining safe and livable communities

ABOUT THE PROJECT

The Moonlight Beach Barrels and Storm Water Repairs Project will complete point repairs and line the three existing 72-in metal storm water pipes that connects Cottonwood Creek with the Pacific Ocean. This project also includes repairs to the south channel bank of Cottonwood Creek upstream of the metal storm water pipes.

The work to line the pipes was identified in the City's Annual Storm Drain Management Program which identifies pipes in need of rehabilitation. The south channel bank of Cottonwood Creek collapsed after a storm event in November 2023 and needs repair. If these drainage facilities are not rehabilitated, it increases the risk of failure and possible contamination of groundwater and surface waters.

This project is part of the City's ongoing commitment to maintaining safe and livable communities through consistent maintenance, as outlined in the City's Strategic Plan.
